(ANSA) - ROME, JAN 30 - There has been a further decline in COVID-19 cases in the last week, the GIMBE health foundation said Monday, pointing to a weekly 26.5% drop in infections.

Deaths were down a weekly 30% and hospitalisations down 18%, the GIMBE Foundation's independent monitoring of the week 20-26 January showed.

Intensive care admissions were down 9.7%.

Compared with the previous week, there has been a decrease in new cases (38,159 against 51,888) and deaths (345 against 495).

There was also a decrease in the number of currently positive cases (251,970 against 300,050), people in home isolation (247,684 against 294,820), admissions with symptoms (4,081 against 5,003) and intensive care (205 against 227).

Daily administrations of the fourth doses of the anti-Covid vaccine are down (-30.6%) and 11.9 million people are currently uncovered, said the Foundation's independent monitoring for the week of 20-26 January.

Coverage for the fifth dose is instead 13.5%.

As of 27 January, there are 6.78 million people over the age of 5 who have not received a single dose of vaccine.

On the other hand, 7.25 million people have not yet received the booster dose (third dose). (ANSA).
